DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Viteri US 6170264 in view of Lalande WO 02/083591.

Viteri teaches a low to no pollution generating hydrocarbon combustion based power generation systems, including fossil fuel burning power plants that utilize gas and/or steam turbines (Column 1). Viteri uses terrestrial formations such as underground geological formations and oceans to sequester carbon dioxide (Column 1).

Viteri does not expressly state the steps of biologically transforming the carbon dioxide into carbonated species.

Lalande teaches a process of reducing the accumulation of greenhouse gases (Page 1 Lines 15-20) using carbonic anhydrase to convert carbon dioxide produced by the burning of fossil fuels into hydrogen and bicarbonate ions (Page 8). The ions are mixed with calcium chloride or sea salts and the pH is adjusted to cause carbonates to precipitate (Page 8). The precipitate is used as clinker in a cement making process (Abstract).

At the time of invention it would have been obvious to perform the process of Viteri to include the steps of biologically transforming carbon dioxide into carbonated species in view of the teaching of Lalande. The suggestion or motivation would have been to transform harmful

greenhouse gas into a carbonated metal harmless to the environment and useful in cement making processes (Page 8).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to JAMES A. FIORITO whose telephone number is (571)272-7426. The examiner can normally be reached on 9am - 6pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Stanley Silverman can be reached on (571) 272-1358. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
